Section 3

Support Escalations & Partnerships

Support escalation principles

As not every support case can be resolved at the point of report, it is important to outline the process by which cases can be escalated.

Functional escalations

The Logged ticket first moves through our engineers within the time allotted for that severity level.

Hierarchical escalations

If you have questions about the operation of the service desk, wish to compliment the team, or simply require more information about an incident, contact the Service Delivery Manager.

Support escalation process

- Escalation applies during both business and after business hours.
- When a support issue needs to be escalated, the first responsible Interlinked contact is the Service Desk Lead.
- If additional escalation is required beyond the Service Desk Lead, then escalate to the Technical Account Manager.

Section 4

Infrastructure Projects

Areas of focus:

- **Business Analysis**
- **Solution Design**
- **Deliver Projects**
- **Customer Tech Leadership Plans**
- **Advanced problem-solving escalation for the Helpdesk team**

Process

**When not sure 'who' in the Project teams to talk to, email
Maher.Nada@interlinked.com.au**

As Project Manager Maher is across all active projects and your initial contact when uncertain if a new project is required.
